Prototype

1.0

# Integration

delivery method: prototype on Github  
language: HTML, CSS, Javascript

- The totality of your source files, except all useless files (binary, temp files, obj files,...), must be included in your delivery.

## SUBJECT

Based on the visual of your moodboard and mockups, you must integrate your pages in HTML5 and CSS3, respecting W3C standards and optimizing SEO and accessibility as much as possible.

Google Lighthouse is particularly effective for SEO testing.

WAVE is used to test its accessibility : <https://addons.mozilla.org/en-US/firefox/addon/wave-accessibility-tool/>

## RESTRICTIONS

---

Your site must be responsive. Building on your previous work, now imagine how your solution could react on a smaller screen.

You must at least complete the following pages:

- Home
- Login
- Registration
- Recipe

You must at least add two JavaScript animations. You are free to use any tools you want.

Your solution must be strictly equivalent on the most popular browsers. (Chrome, Firefox et Internet Explorer).
